This last air he extricated from nitre by heat, from the black oxide of manganese, and from other substances, and gave it the name of empyreal air. He showed that a mixture of two parts of foul air and one part of empyreal air possesses the properties of common air. The foul air of Scheele was the same with the phlogisticated air of Priestley, or with what is now known by the name of aaotic gas. His empyreal air is the same with the dephlogisticated air of Priestley, or with what is at present called oxygen i.ai. According to him, therefore, air is a compound of two parts of azotic and one part of oxygen gas. He accounted for the diminution of air by the liquid sulphurets and other similar bodies by his theory of...
